

STORET Conference Call – March 24th, 2005 12:00-1:00 PM Eastern Time

Introduction (Cary McElhinney)

- The minutes from all previous conference calls are available over the web: <http://www.epa.gov/storet/confcalls.html>
- The next call will be Thursday May 12th, 2005. The call number is 202-275-0170 0904#.
- If you have a special topic you'd like to lead for an upcoming call, please email mcelhinney.cary@epa.gov
- EPA would like to hear comments you have on the quality of these conference calls. Please send them to storet@epa.gov
- Please subscribe to the STORET automated listserver for announcements regarding conference calls: <http://www.epa.gov/storet/listserv.html>

Update from STORET Team

- EPA has added two new people to the STORET team: Wendy Reid and Kristin Gunthardt.

Data Warehouse Refresh Schedule

- There have been some delays on a monthly basis with the refresh schedule. We were hoping to have the refresh done on Monday, but that won't happen due to problems encountered this week.
- We now have scheduled the expected release of the most current version for Monday, April 4. This release will include exports dating back to February.

Open O/A and Comment Period

1. I am having configuration problems. Is there a trouble shooting document that has a list of common problems and solutions? (FL)
 - The install guide goes over some common problems.
 - Florida's problems are site specific in that they are maintaining personal and client/server versions. They also have stand alone problems.
 - There are very few common problems, but please use the listserver to share those issues.
2. Is there a firm date for the June training? (MD)
 - Not yet. We are using a new facility in DC and will get the dates out soon.
 - The address of the site will be posted on the web along with hotels in the area. Are there any preferred dates?
 - Earlier in June probably works best.
3. Are there any updates on the beaches project? (OH)
 - Charles Kovatch will be able to answer that question. We support the beaches program by building tools, but he is not a part of the STORET team.
4. Are there any implications for the public to use WebSIM? (OH)
 - Web versions are only used and supported by other projects. EPA is not able to support a web product. The STORET web site could not be updated and we would have to control log on. We do not have the manpower to do it.
 - We consider the beaches program and Region 8 pilot projects. We are watching to see how they go, but beyond that we are not sure where we will go with a web-based product.
 - Gold Systems does support WebSIM and may be a good source of information.

Participants on call (based on who emailed storet@epa.gov)

Joe Wilson	US EPA HQ
Lee Manning	US EPA HQ
Kevin Christian	US EPA HQ
Cary McElhinney	US EPA HQ
